

## INDEX

(Prepared by Dr. Robert L. Volle)

- ACTH, 318
  - membrane permeability, 316
  - steroidogenesis, 323
- Adenosine-3',5'-phosphate, 266
  - catecholamines on formation, 271
  - chemical properties, 266
  - formation, 267
  - inactivation, enzymatic, 270
  - ketone bodies, 278
  - phosphorylase, 279
- Adler, T. K., *see* Way, E. Leong, 383
- Alimentary canal, foetal, 62
- Amphetamine, 499
- Analeptics, 447
- Androgens, 332
- Anoxia, 160, 462
  - analeptics and, 462
  - pulmonary circulation, 160
  - pulmonary hypertension, 176
  - nervous mechanisms, 170
- Anticoagulants in pregnancy, 61
- Antithyroid drugs in pregnancy, 62
- Aviado, D. M. The pharmacology of the
  - pulmonary circulation, 159
- Baird, J. D., *see* Duncan, L. J. P., 91
- Baker, J. B. E. The effect of drugs on the
  - foetus, 37
- Carcinogenic agents, effects on foetus, 72
- Cardiovascular system, foetal, 54
  - cardiac glycosides, 57
  - epinephrine, 54
  - foetal heart, isolated, 58
  - hexamethonium, 56
  - norepinephrine, 54
  - renin and angiotonin, 57
- Catecholamines, 265, 330
- Central nervous system, foetal, 39
  - anaesthetics, 42
  - analgesics, 39
  - carbon monoxide, 49
- Central nervous system stimulants, 447
- Ceruloplasmin, 358
  - alterations in blood, 364
- Chemotherapy and antibiotics in pregnancy, 69
- Clearing factor lipase, 241
  - assay, 243
  - fat transport, 249
  - heparin, 246
  - inhibitors, 244
  - mechanism, 244
  - release, 248
- Copper, 355
  - alterations in blood, 364
  - deficiency, 366
  - metabolism, 355
  - toxicity, 369
- Copper-proteins, 364
  - cerebrocuprein, 362
  - ceruloplasmin, 358
  - cytochrome C oxidase, 363
  - erythrocuprein, 363
  - tyrosinase, 361
- Diguanides, 141
  - clinical use, 144
  - hypoglycaemic action, mechanism, 142
  - pharmacology, 141
- Duncan, L. J. P. and Baird, J. D. Compounds administered orally in the
  - treatment of diabetes mellitus, 91
- Estrogens, 325
  - amino acid activation, 329
  - mitosis, 332
  - RNA, 332
  - transhydrogenase, 325
- Fat transport, 241
- French, J. E., *see* Robinson, D. S., 241
- Glutarimides, 482
  - antianesthetic action, 486
  - autonomic nervous system, 486
  - body temperature, 486
  - cardiovascular system, 486
  - central nervous system, 484
  - respiration, 485
- Growth hormones, 322
- Guanidine derivatives, 139
  - decamethylenediguanidine, synthaline
  - "A", 139
  - hypoglycaemic action, mechanism, 140
  - methylguanidine, 139
- Hahn, F. Analeptics, 447
- Heparin, 241
- Hormones, 301
  - amino acid transport, 315
  - cellular and subcellular structure, 316
  - coenzymes, 325
  - membrane permeability, 304
- Hypoglycaemic agents, oral, 91

- diguanides, 141
- guanidine derivatives, 139
- sulphonylureas, 93
- Insulin, 304
  - lipogenesis, 319
  - membrane permeability, 309
  - protein anabolism, 328
- Lipaemia, 241
  - clearing factor, 242
  - clearing reaction, 241
- Lipase, *see* clearing factor lipase
- Levallorphan, 425
- Membrane permeability, 304
  - ACTH, 316
  - insulin, 309
  - pinocytosis, 317
- Meperidine, 426
- Morphine and surrogates, 383
  - absorption of, 388
  - distribution, 389
  - excretion, 401
  - metabolism, 402
  - methods of estimation, 385
  - physical dependence on, 435
  - tolerance to, 410
- Myasthenia gravis, neonatal, 51
- Nalorphine, 384
  - metabolism of, 407
- Nikethamide, 492
- Organic bases, renal excretion of, 4
  - active transport, 6
  - creatine, 30
  - creatinine, 30
  - metabolic intermediates and inhibitors, 15
  - "non-ionic diffusion", 25
  - refractory inhibitors, 18
  - structure-activity relationships, 12
  - transport systems, relationship to other, 9
  - trimethylamine and trimethylamine oxide, 29
  - urea, 30
- Parathyroid hormone, 341
- Peters, L. Renal tubular excretion of organic bases, 1
- Phosphorylase, 276
  - ACTH, 291
  - catecholamines, 279, 330
  - glucagon, 290, 330
  - glycogen synthesis, 289
  - 5-hydroxytryptamine, 291
- Picrotoxin, 477
  - antianesthetic action, 480
  - autonomic nervous system, 478
  - body temperature, 479
  - cardiovascular system, 479
  - central nervous system, 477
  - respiration, 479
- Pulmonary circulation, 160
  - anoxia, 160
  - blood flow, 163
  - blood volume, 167
  - nervous mechanisms, 170
- Pulmonary edema, 181
  - digitalis glycosides, 202
  - therapy of acute, 210
  - vasoconstrictors, 181
- Pulmonary hypertension, 176
  - adenosine triphosphate, 177
  - adrenergic blocking agents, 193
  - anoxia, 160
  - ganglionic blocking drugs, 195
  - histamine, 178
  - 5-hydroxytryptamine, 176
  - irritant gases, 182
  - sympathomimetic agents, 184
  - therapy, 199
  - vasodilator drugs, 188

## CONTENTS

### No. 1, MARCH 1960

Renal tubular excretion of organic bases. LAWRENCE PETERS.....	1
The effects of drugs on the foetus. J. B. E. BAKER.....	37
Compounds administered orally in the treatment of diabetes mellitus. LESLIE J. P. DUNCAN AND JOYCE D. BAIRD.....	91

### No. 2, JUNE 1960

The pharmacology of the pulmonary circulation. DOMINGO M. AVIADO.....	159
Heparin, the clearing factor lipase, and fat transport. D. S. ROBINSON AND J. E. FRENCH.....	241

### No. 3, SEPTEMBER 1960

The relation of adenosine-3',5'-phosphate and phosphorylase to the actions of catecholamines and other hormones. EARL W. SUTHERLAND AND T. W. RALL.....	265
Some effects of hormones on cells and cell constituents. JAY TEPPERMAN AND HELEN M. TEPPERMAN.....	301
Copper metabolism. I. HERBERT SCHEINBERG AND IRMIN STERNLIEB.....	355

### No. 4, DECEMBER 1960

The pharmacologic implications of the fate of morphine and its surrogates. E. LEONG WAY AND T. K. ADLER.....	383
Analeptics. F. HAHN.....	447
